Professional Summary

Results-driven Software Consultant and Full Stack Developer with 6 years of experience designing, modernizing, and deploying enterprise applications across cloud and on-premise environments. Expertise in Java, Spring Boot, Python, React, AWS Cloud, Microservices Architecture, REST APIs, and CI/CD pipelines. Experienced in migrating legacy applications to scalable cloud-native microservices, designing distributed systems, developing frontend applications using AWS Cloudscape, and managing deployment, monitoring, and production support.

Technical Skills

Programming: Java, Python, JavaScript, SQL

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, ReactJS, AWS Cloudscape, JUnit, Mockito

Cloud: AWS, EC2, S3, IAM, CloudWatch, ECS, ECR

Architecture: Microservices, REST APIs, Distributed Systems, Legacy Modernization

DevOps: Docker, Jenkins, Git, GitHub, GitHub Actions, GitLab, Gerrit, SonarQube

Databases: PostgreSQL, MySQL, MongoDB

Core Competencies

Microservices Architecture • Legacy Modernization • Cloud Migration • AWS • Full Stack Development • Solution Design • CI/CD • Agile • Production Support • Performance Optimization

Professional Experience

Consultant – Full Stack Developer

Deloitte USI., Pune (September 2025 – Present)

- Designed and developed **cloud-native microservices to modernize legacy enterprise applications**, enabling scalable and maintainable architecture on AWS.
- Led the decomposition of monolithic applications into independently **deployable microservices for data transfer, web tools**, and backend business services.
- Developed 20+ REST APIs** supporting enterprise business workflows using **Java Spring Boot and Python** for enterprise integrations and secure data exchange.
- Designed and implemented responsive **frontend applications using AWS Cloudscape Design System**, improving usability and consistency across internal web tools.
- Managed **end-to-end deployment activities across AWS environments**, including build automation, and production deployments.
- Configured application **monitoring, logging, and operational dashboards using AWS** monitoring services to improve system observability and incident response.
- Collaborated with architects, product owners, QA teams**, and **offshore/onshore stakeholders** to deliver enterprise solutions using Agile methodologies.
- Participated in architecture discussions, **design reviews, sprint planning, and production support** activities.

Java Full Stack Developer

KPIT Technologies Ltd., Pune (March 2022 – September 2025)

- Designed and developed enterprise-grade backend systems using **Core Java, multithreading, collections, and design patterns**.
- Built **10+ microservices** supporting enterprise modernization initiatives using **Spring Boot, JPA, Hibernate ORM**, implementing **REST APIs, exception handling, and validation**.
- Optimized backend performance through **multithreading** and **concurrent programming** techniques.
- Designed reusable service components that reduced code duplication and improved maintainability.
- Collaborated **with cross-functional teams to deliver multiple production releases** while maintaining **high code quality**.
- Resolved production incidents through **root cause analysis** and implemented long-term preventive solutions.
- Reviewed 100+ pull requests**, improving code quality and reducing production defects.
- Configured and monitored code quality using **SonarQube**; maintained **CI/CD pipelines** using **GitLab and GitHub**.
- Worked in **Agile** teams, contributing to **sprint planning, story grooming, and retrospectives**.
- Used **Eclipse SWT** for developing lightweight **GUI** applications as needed.

Java Full Stack Developer

Wolters Kluwer Pvt. Ltd., Pune (April 2021 – March 2022)

- Developed and maintained data-driven **backend** modules using **Spring Boot, and JPA, & SQL Native Queries**.
- Collaborated with product teams to enhance reporting applications with efficient and secure data access patterns.
- Led static code analysis and **database** (SQL Native Queries) security improvements using **SonarQube**.
- Built and integrated **backend** services with frontend modules using **REST APIs**, improving application responsiveness.
- Supported **Agile development** practices and **automated CI/CD processes** using **Jenkins & TeamCity**.

Associate

AXA Business Services, Pune (September 2019 – January 2021)

- Developed data integration scripts using **Python** and automated data pipelines for efficient **ingestion** and transformation.
- Created and optimized complex **SQL queries** and stored procedures for business-critical **data reporting**.
- Built **lightweight utility scripts** to streamline reporting and internal dashboards using **Python**.
- Worked closely with **data analysts** and business users to deliver reliable, data-backed insights
- Provided technical support and enhancements to tools used for **financial data aggregation** and **analysis**

Education

Bachelor of Engineering, Computer Science and Engineering - Shivaji University (2015 – 2019) Maharashtra, India

Skills

Leadership & Teamwork, Problem Solving & Decision Making, Time Management & Adaptability, Effective Communication & Presentation, Agile & Risk Management
